A close-up photograph of several fresh orange slices. The vibrant orange color of the fruit is prominent, and numerous clear water droplets are scattered across the surface of the slices, giving it a fresh and juicy appearance.

A microscopic view of cells, likely skin cells, showing their complex internal structures and the fluid environment surrounding them. The image has a soft, ethereal quality with a light blue and white color palette.

HYALURONIC ACID

A detailed 3D molecular model of a collagen molecule. It features a complex arrangement of spheres representing atoms, connected by rods that form a triple helix structure, characteristic of collagen's molecular architecture.

COLLAGEN

A microscopic view of cells, similar to the one above, but with a distinct purple and blue color tint. The cellular structures are visible, and the overall image has a more dramatic and scientific feel.
